## Pressure \& Temperature

Name: $\qquad$
*Show set up and all work (including units) to receive full credit.

1) The air pressure inside a submarine is 0.72 atm . What would be the height of a mercury column inside the submarine?
2) The recommended air pressure in a certain tire is 242 kPa . What is this pressure in atmospheres?
3) An experiment in a lab is performed at a pressure of 749.1 mm Hg . What is this pressure in torr?
4) What would be the pressure of a room be if the mercury read 850 mm Hg in torr, atmospheres, psi and in kPa ?
5) Fill in the data table with appropriate values by performing temperature conversions:

| Fahrenheit $\left({ }^{\mathrm{O}}\right)$ | Celsius $\left({ }^{\circ} \mathrm{C}\right)$ | Kelvin $(\mathrm{K})$ |
| :--- | :--- | :--- |
|  |  | 373 |
|  | 37 |  |
| 32 |  |  |
|  | 25 |  |
| 85 |  | 0 |
|  |  |  |

1a) A bag of potato chips is sealed in a factory at a pressure of 769 mm Hg . What is this pressure in pascals?
b) The bag of chips is shipped to a town in Colorado, where the air pressure is 0.94 atm . What is the difference in pressure (in kPa ) between the pressure in the bag and the atmospheric pressure in the town?
2) Complete the following pressure conversions:
a) 32.0 psi --> atm
c) $1960 \mathrm{~mm} \mathrm{Hg} \mathrm{-->} \mathrm{kPa}$
b) 25025 Pa --> torr
d) 5.11 atm --> psi
3) Fill in the data table with appropriate values by performing temperature conversions:

| Fahrenheit $\left({ }^{\mathrm{O}} \mathrm{F}\right)$ | Celsius $\left({ }^{\circ} \mathrm{C}\right)$ | Kelvin $(\mathrm{K})$ |
| :--- | :--- | :--- |
|  |  | 325 |
| 65 |  |  |
|  |  | -54 |
|  | -178 |  |
| -30 |  |  |
|  | -40 |  |
| -475 |  |  |

*Show set up and all work (including units) to receive full credit.
1a) A helium balloon is released from the ground where the atmospheric pressure today is 14.3 psi . How many atmospheres is this?
b) The balloon floats to an altitude of $70,000 \mathrm{ft}$ where the pressure is 41 kPa . What is the difference between the two altitudes in atmospheres?
2) Complete the following pressure conversions:
a) 32.0 atm --> psi
c) 1960 torr --> Pa
b) 52025 Pa --> mmHg
d) 192 kPa --> atm
3) Fill in the data table with appropriate values by performing temperature conversions:

| Fahrenheit $\left({ }^{\mathrm{O} F)}\right.$ | Celsius $\left({ }^{\circ} \mathrm{C}\right)$ | Kelvin (K) |
| :--- | :--- | :--- |
| 450 |  |  |
|  |  | 322 |
|  |  | -27 |
| 123 |  |  |
|  | -25 |  |
| -40 | -271 |  |
|  |  |  |
